

# Adoption-Sensitive Clinical Care (ASCC) Training

Designed by medical and adoption experts for healthcare professionals

In healthcare, **preparedness is paramount**. Just as clinicians train for rare diseases or low-frequency emergencies, adoption-competent care ensures you are ready for every patient who walks through the door.

## Why ASCC?

**Competence:** Adoption training helps staff lead with competence when adoption situations arise, avoiding costly emotional or procedural mistakes

**Quality:** Your hospital is already treating members of the adoption community. Understanding the needs is key to providing high-quality healthcare to these patients.

**Impact:** Birth parents have identified healthcare staff as a source of stigma and shame around their decision to make an adoption plan. With proper training, your hospital can ensure an impact of support and compassion rather than stigma and shame.

ASCC gives you the tools to provide trauma-informed, ethical, and sensitive care to patients facing unintended pregnancies and considering adoption.

Our agency is available to deliver this important training to your staff!
