

Adoption-Sensitive Clinical Care (ASCC) Training

Designed by medical and adoption experts
for healthcare professionals

In healthcare, preparedness is paramount. Just as clinicians train for rare diseases or low-frequency emergencies, adoption-competent care ensures you are ready for every patient who walks through the door.

Why Adoption Training Matters

Competence

When adoption situations arise, training helps your staff provide **competent, consistent care**, meeting emotional and procedural needs with confidence.

Quality

Your hospital is already treating members of the adoption community daily. Understanding their needs is key to providing high-quality healthcare to these patients.

Impact

Receipt of accurate information and non-coerced decision-making are two of the strongest predictors of birth mothers' adoption satisfaction. ASCC training equips your staff to be a vital source of clarity and respect for patients facing unintended pregnancies.

Priorities

Adoption training equips entire healthcare teams to uphold patients' **autonomy and dignity** as they navigate pregnancy options and the adoption process.

Adoption-Sensitive Clinical Care (ASCC) Training

training.hbasct.org

Gain tools to provide trauma-informed, ethical, and sensitive care to patients considering adoption or within the adoption community

ASCC training uses **Understanding Infant Adoption 7 (UIA 7)**, a national, evidence-based, trauma-informed training curriculum

UIA 7 was developed by medical professionals, adoption experts, and members of the adoption community

Our agency is available to deliver this important training to your staff!
